Note: All figures are as of July 1st of the year stated | Median Age = The age at which half the population is younger and half is older  
Child Dependency = Population of age 0 to 17 / Population of age 18 to 64 | Elderly Dependency = Population of age 65+ / Population of age 18 to 64  
Total Dependency = The sum of Child Dependency and Elderly Dependency | Sex Ratio = Number of males per 100 females  
Total Fertility Rate = Sum of the age specific birth rates over all ages of child bearing period (15-49)

Note: All figures are as of July 1st of the year stated  
Due to revisions on the part of Statistics Canada, the sum of the components may not equal the population change.

\*\* International In-Migration includes Permanent Immigrants, plus the net change in Non-Permanent Residents (persons residing temporarily in Canada who hold a student, work, or minister's permit, or who are refugee claimants).

\*\* International Out-Migration includes Permanent Emigrants, plus the Net Temporarily Abroad (Residents who have temporarily moved to another country, but have the intention of returning to live in Canada), minus Returning Emigrants (Residents who emigrated from Canada in the past, and who are returning with the intention of once again becoming permanent residents).
