

## Accessing the BC Manufacturers' Directory

### Online, Free

The online search engine is aimed at users wanting to filter the database to isolate companies matching specific criteria. Search by information such as company name, address, general phone number, e-mail, website, sales, employee range, exports, sectors, NAICS code, and products.

#### Limitations:

- Detailed Search results are limited to 25 per user, per day to encourage commercial users to purchase the BCMD
- Online version does not include the names of contacts

### Paper Publication (\$45 plus tax)

The paper directory is published in the spring of each year and is nearly 600 pages of cross-referenced information at your fingertips. Search by company name, products, industry or community. Many purchasers like to use the publication in conjunction with the online search engine. The print version includes information current to February, 2009.

#### Benefits:

- Contains the same information as online PLUS includes the name of one main contact

### Electronic Extract (\$350 plus tax)

Sent as a CSV file, the electronic extract can easily be imported into most spreadsheet and database programs, such as Microsoft Excel. Ideal for users contacting a large number of companies as it is mail merge ready. On the date of purchase, we extract a copy of the BCMD from our database ensuring you receive the most up-to-date information and the CSV file is then sent by e-mail (CD may be requested). Field definitions are available through the Glossary section of this site.

#### Benefits:

- Contains the same information as above PLUS includes up to TWO contact names with their direct e-mails and phone numbers (when provided)
- Save time! Create a Mail Merge document and contact a large number of companies at once

### NEW! CUSTOM CSV Extract (\$0.10 per record - minimum \$75 order)

Looking for a CSV file but don't need the entire directory? Provide us criteria based on the fields available in the directory and we will create a custom extract – all the fantastic benefits of the electronic extract in a smaller package!
